

IMAGE PRE-PROCESSING

Define The Parameters /Arguments For Image Data Generator Class

```
import keras  
from keras.preprocessing.image ImageDataGenerator  
#Define the parameters/ arguments for ImageDataGenerator class  
train_datagen= ImageDataGenerator (rescale=1./255,shear_range=0.2, rotation_range=180,  
zoom_range=0.2, horizontal_flip=True)  
  
test_datagen= ImageDataGenerator (rescale=1./255)
```
